

Testing for SOA and the tools available in the market

Webcast: zdnet.com

<http://whitepapers.zdnet.com/abstract.aspx?docid=335218>

Participants: [David Christiansen](#) and Michael Kelly

Format: Webcast

Run time: a little over one hour

Topic:

Testing a Service Oriented Architecture is an interesting and difficult challenge, requiring a solid understanding of the SOA design and underlying technology, the functional purpose of the SOA, and testing tools and techniques. In this Webcast David and I introduce the challenge of testing a Service Oriented Architecture and cover some of the tools available and offer some tips for thinking about the tools you select.
